Intelligent Force Sensing Solution

Extending robot capabilities for advanced tactile applications

Complex assembly and machining applications today demand advanced tactile control beyond what traditional robots can provide, in terms of force sensing and robot dexterity. Omron’s Intelligent Force Sensing Solution enables full automation of applications that require precise tactile feedback, by combining a state-of-the-art force sensor with Omron’s superior suite of enterprise robots.

Key features:
- Precise measurement of forces and moments in all three dimensions
- Fast and simple installation for any type of robot (SCARA, parallel, or articulated)
- Easy integration with Omron’s ACE software platform
- Several functions and operating modes to monitor and control forces

Key benefits:
- Automate processes that require force control and increased productivity
- Ensure product quality without creating process bottlenecks
- Decrease downtime risk associated with loss and training of skilled labor
- Increase safety and flexibility of the work cell

Force sensing custom applications:
As part of the product release, a sample white paper for a Force Guided Part Insertion application is available. The objective is to use the Force Sensor to automatically locate the edges and orientation of a box that can hold shafts, generate a frame of reference, and insert a shaft in the target while ensuring the applied force does not exceed a predefined threshold.

More applications are coming soon!
Authorized Distributor:

Controllers & I/O
- Machine Automation Controllers (MAC) • Motion Controllers
- Programmable Logic Controllers (PLC) • Temperature Controllers • Remote I/O

Robotics
- Industrial Robots • Mobile Robots

Operator Interfaces
- Human Machine Interface (HMI)

Motion & Drives
- Machine Automation Controllers (MAC) • Motion Controllers • Servo Systems
- Frequency Inverters

Vision, Measurement & Identification
- Vision Sensors & Systems • Measurement Sensors • Auto Identification Systems

Sensing
- Photoelectric Sensors • Fiber-Optic Sensors • Proximity Sensors
- Rotary Encoders • Ultrasonic Sensors

Safety
- Safety Light Curtains • Safety Laser Scanners • Programmable Safety Systems
- Safety Mats and Edges • Safety Door Switches • Emergency Stop Devices
- Safety Switches & Operator Controls • Safety Monitoring/Force-guided Relays

Control Components
- Power Supplies • Timers • Counters • Programmable Relays
- Digital Panel Meters • Monitoring Products

Switches & Relays
- Limit Switches • Pushbutton Switches • Electromechanical Relays
- Solid State Relays

Software
- Programming & Configuration • Runtime
